

# PIOTR ANDRZEJ POSPIECH

## Frontend Lead

### JOB REFERENCE: FRONTEND LEAD

Piotr has been an invaluable member of our team, serving as our Frontend Lead for the past year. During this time, he has played a crucial role in developing the first iteration of our news monitoring platform's frontend.

From September 2023 to the present, Piotr's efforts have contributed significantly to Kupla's growth from a prototype to a fully operational company. Our platform now serves a diverse range of clients, including banks, payment providers, municipalities, football and handball clubs, and various supply companies. Despite the considerable time constraints, Piotr has successfully established a robust codebase for our user-facing interface.

Piotr has demonstrated a strong command of modern technologies, building our UI using Next.js and React, TailwindCSS, with DynamoDB and Cognito on the backend.

Throughout his time with us, Piotr has shown great commitment, a strong work ethic, and a continuous eagerness to learn and improve.
